Note: Please take your database backup before Installing the Extension.

1. Introduction

This Magento 2 extension allows you to regenerate products and category SEO friendly URL.

One of the most basic thing for ecommerce is to use SEO-friendly URL structures for web shop. A good URL structure can help the indexation process of your web shop, but, unfortunately, Magento 2 doesn't provide any option to re-generate or reindex product/category URL. And to re generate product/category URL is most common thing (i.e. after changing in product name, changing in category name, after Import products, after Installation of any extension, SEO marketing etc)

To overcome this problem we at Shreeji Infosys provide an extension URL Rewrite Generator which allow store owner to re generate all products/categories URL by executing only command. After using this extension your web shop URL becomes SEO-friendly. Please go through below some highlighted feature for extension.

Robust Features Of Import Export Categories

- Generate SEO URL friendly easily for all products as well as all categories
- Allow to generate URL for specific store
- Allow to generate URL for specific products or specific category
- Supports all Magento SEO configurations
- Supports multi-store environments
- Highly use for migrating data Into Magento 2
- Making store owner life easy
- Easy Installation and Ready to use

Standard Features

- Follow Magento2 coding standards for this extension.
- Follows Magento2 Extension Development Guideline.
- Compatible with Latest Magento 2 editions.
