1. Introduction

This Magento 2 extension allows store owner to define product price discount (Fixed or Percentage) on the customer base.

Customer Discount Magento 2 extension gives store owners a special likelihood to specify the discount of your products on the customer base. It means that store owner can specify the discount on only selected customer(s) with selected product(s). So store owner can easily sell the product with a special price to only loyal customers. Customer Discount extension allows you to specify the discount type in either fixed manner or in percentage. Moreover, this extension also sets the special price while creating an order from Magento backend.

By using this extension store owner can easily reward to most loyal customers and make them feel valued. This extension is also helps to promote products to only selected customers from the long list.

Customer Discount Features

- Enable/Disable from backend
- Ability to set the discount amount on the customer base
- Discount type can be a fixed amount or percentage of the product
- On front-end discount amount will less of the original product price and display as product special price
- The customer can see the product special price on product listing page, product detail page etc
- Only selected product considers as special price on the front end
- This extension is also working while creating order from backend
- Support multiple store view
- Easy Installation and Ready to use
- Plug & play.
