1. Introduction

This Magento 2 extension allows store owner to hide the product based on Individual customer or customer group.

As an eCommerce store owner of Magento you or your business model has requirements to show/hide product(s) to only special customer or to only specific customer group. For example If store owner wants to restrict special products for your wholesale customers. So normal customers will not see these special products, but the limited customers with a special link will be able to see it and purchase it.

To keep in mind the Importance of this feature we at Shreeji Infosys developed this Hide Product By Customer/Customer Group extension for Magento 2 which allows you to hide the product based on customer. This extension also allows you to hide the product based on customer group. Once you installed the hide product by customer/customer group extension you can choose the customer group selection in every product edit section as well as you can also perform the mass action for multiple product at time to save time. And In order to hide the particular product from a customer you can find a product selection list in customer view.

Hide Product by Customer/Customer Group Features

- Enable/Disable from backend
- Significantly effortless to hide the product based on customer
- Very easy to hide the product based on customer group

Hide the product from customer:

The screenshot shows a web application interface for customer management. At the top, there is a navigation bar with buttons: Back, Delete Customer, Reset, Create Order, Reset Password, Force Sign-In, Save and Continue Edit, and Save Customer. On the left, a sidebar menu includes: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The main content area is titled 'CUSTOMER INFORMATION' and contains a sub-menu with: Customer View, Account Information, Addresses, Hide Products Information (highlighted), Orders, and Billing Agreements. The 'Hide Products Information' section displays a table with 2 records found. The table has columns for selection, ID, Name, SKU, and Price. The first row is a filter row with a 'Yes' dropdown and input fields for 'From' and 'To'. The second row (ID 2) and third row (ID 3) are selected with checkboxes. The table also includes a 'Search' button, a 'Reset Filter' link, and pagination controls showing '20 per page' and '1 of 1' records.

<input checked="" type="checkbox"/>	ID	Name	SKU	Price
Yes ▾	<input type="text"/>	<input type="text"/>	<input type="text"/>	From <input type="text"/> To <input type="text"/>
<input checked="" type="checkbox"/>	2	Test2	Test2	\$10.00
<input checked="" type="checkbox"/>	3	Test3	Test2-1	\$10.00

Description:

To hide the product from customer you need to open the customer from Customers> All customers and select the customer which you want. After opening the customer click on **Hide Product Information** tab to select the product.

Just select the customer from grid which you want to hide and save and clear cache in order to see result on frontend.
